Food and Agriculture Mapper and Explorer Data Collection and Methods

County-level measures in the 2026 FAME data warehouse

September 2026

Prepared by Dr. Anders Van Standt, Assistant Professor of Rural Economic Development Colorado State University. Questions may be directed to a.vansandt@colostate.edu.

This Data Brief is prepared as part of USDA AMS Cooperative Agreement AM250300WAMSC005

Purpose This brief documents the sources, geographic processing, variable construction, and interpretation of the 193 measures in the current Food and Agriculture Mapper and Explorer metadata inventory. It is designed for researchers, practitioners, grant applicants, and community partners who need to understand what each county measure represents before using it in analysis or visualization.

Scope The inventory combines public data from 12 source programs. Source years range from 2019 through 2026, and most records represent a single data vintage rather than a time series. Zero and missing values follow documented source-specific rules; a blank should not automatically be interpreted as absence.

Documentation basis Collection methods were verified against the current Stata do-files, corrected metadata workbook, and September 2026 master extract. When a metadata year or definition conflicts with the implemented transformation, the catalog reports the code-supported interpretation and notes the difference.

Overview

FAME brings county-level measures from agriculture, food access, health, environmental, educational, financial, and labor-market sources into a common long format. The final extract contains county FIPS and ANSI identifiers, county and state names, state abbreviation, reference year, variable name, and value. Source-specific intermediate files also carry a topic-area field, which is removed from the public master extract. The master workflow standardizes county names, appends the component datasets, and verifies that every county-variable pair is unique.

Source program	Measures
U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages	105
U.S. Census Bureau, American Community Survey	17
U.S. Department of Agriculture, National Agricultural Statistics Service, Census of Agriculture	17
Centers for Disease Control and Prevention, National Environmental Public Health Tracking Network	16
U.S. Department of Agriculture, Economic Research Service, Food Environment Atlas	11
U.S. Department of Agriculture, Food Safety and Inspection Service	8
U.S. Environmental Protection Agency (EPA)	6
U.S. Department of Agriculture, Local Food Directories	4
Feeding America, Map the Meal Gap	2
IES National Center for Education Statistics	2
Area Health Resources Files	1
Federal Deposit Insurance Corporation (FDIC)	1

Using the measures responsibly

- Treat the year as the reference year of the source value, not necessarily the download year or the year the FAME files were assembled.
- Interpret zero according to the source rule. Local Food Directory, EPA facility, and FDIC unmatched county counts are coded zero; Census of Agriculture Z values are zero; suppressed or nondisclosed estimates remain missing.
- Do not sum QCEW industries across different NAICS levels. Parent industries and their component industries appear together in the inventory. For example, industries 3111 and 3112 are already counted in industry 311.
- Interpret ACS county values as 2019-2023 five-year estimates. They describe a multiyear period rather than conditions measured only in calendar year 2023.
- Interpret USDA Local Food Directory counts as listed operations, not a census of all operations. Directory participation and updates are voluntary.
- Interpret facility counts as locations assigned to counties. A count does not describe capacity, output, quality, or accessibility.
- For FSIS, establishments can appear in both mammal *and* poultry categories (i.e., not mutually exclusive). Poultry includes egg-product activities, and the N/A size category includes both explicit N / A values and blank size fields.

Common processing workflow

Step	Action	Implementation
1	Acquire	Download or query the public source files identified in the source-specific sections.
2	Select	Retain the variables, industries, facility types, years, ownership categories, and geographies used by FAME.
3	Standardize	Convert source fields to numeric values, assign FAME variable names, and construct percentages or rates where required.
4	Geocode	Use supplied county FIPS when available. For point directories and selected facility sources, spatially join locations to county boundaries before import into Stata.
5	Merge	Attach county names, state identifiers, and ANSI codes from CountyMaster and inspect unmatched source records.
6	Reshape	Store the data in long form with one county, year, and variable per record, then append all component files.
7	Check	Count missing identifiers and values, review county-state spellings, and sort records by county and variable.

County geography

The workflow uses five-digit county FIPS codes to align source records with counties and county equivalents in the 50 states and the District of Columbia. CountyMaster is built from the Census Gazetteer and incorporates 2024 Census county population estimates for per-capita calculations. County boundary and naming corrections include Oglala Lakota County, South Dakota, and county-equivalent naming conventions in Alaska, Louisiana, Maryland, Montana, and Virginia.

Source specific collection methods

American Community Survey

Seventeen measures come from the 2019-2023 ACS five-year Subject Tables through the Census API. The workflow requests county estimates for age, poverty, disability, insurance, school enrollment, travel time, and place of work. It creates county FIPS from state and county codes. Two age-specific disability rates are constructed from published age-band rates and population counts: ages 18-64 and ages 65 and older. Because these are five-year estimates, the 2023 label identifies the ending year of the pooled period.

CDC Tracking Network

Sixteen health, built-environment, and environmental measures are imported from separate CSV extracts obtained through the National Environmental Public Health Tracking Network API. The Stata workflow converts values to numeric, retains county identifiers and the source temporal field, assigns one FAME variable name per extract, and appends the files. The measures include modeled health prevalence, air particulate matter, sunlight exposure, park proximity, vehicle access, agricultural land, hospital beds, disaster risk, and drought exposure. Underlying data sources and modeling methods differ by indicator, so users should consult each Tracking Network indicator definition rather than treating all fields as direct Behavioral Risk Factor Surveillance System estimates.

Area Health Resources Files

The workflow imports the 2023 count of nonfederal primary care physicians excluding medical residents from the 2025 AHRF release. It divides the physician count by the 2024 Census county population estimate and multiplies by 10,000, resulting in primary care physicians per 10,000 people.

Census of Agriculture

Seventeen measures come from the 2022 Census of Agriculture large Quick Stats file. The code retains county-level records from the economics and demographics sectors and selects farm counts, farm sales, total land in farms, producer and labor counts, conservation-easement acres, agritourism, direct-to-consumer and intermediated sales, and the dedicated produced-and-sold value-added-products items. Commas are removed before numeric conversion. Values coded Z are set to zero, while values coded D become missing. The alternative marketing variables are not mutually exclusive so users should avoid aggregating across variables to avoid double counting.

Food Environment Atlas

Eleven county measures are selected from the stores worksheet of the USDA ERS Food Environment Atlas. Store counts and counts per 1,000 residents refer to grocery stores, supercenters and club stores, convenience stores, specialty food stores, and SNAP-authorized stores. A low-income and low-access measure is merged from a separate Atlas field. The source years vary: low access is 2019, most store measures are 2020, and SNAP retailer measures are 2023. The source value -9999 is converted to missing.

USDA Local Food Directories

Four measures count listed community supported agriculture operations, on-farm markets, food hubs, and farmers markets. Location points were spatially joined to county polygons in ArcGIS Pro, exported by directory type, and summed by county FIPS in Stata. Counties without a matched listing are coded zero. These are counts of directory listings; voluntary participation and uneven updating mean they are not complete censuses of local food businesses. Still, significant operators are assumed to be documented, and missing counties are reported as zero.

FSIS Inspection Directory

The 2026 Meat, Poultry and Egg Product Inspection Directory is classified from each establishment's activities and size fields. Mammal includes records containing Meat Processing or Meat Slaughter. Poultry includes Poultry Processing, Poultry Slaughter, or any egg-product activity. Mixed establishments enter both groups. Size values are standardized to very small, small, large, or N/A; explicit N/A values and blanks are combined. The workflow assigns each establishment to the applicable mammal and/or poultry/egg category and to one of four size categories (very small, small, large, or N/A) and then counts establishments in each of the eight animal-by-size categories within each county.

Quarterly Census of Employment and Wages

The code queries 35 annual 2024 QCEW industry files and retains private ownership, identified by ownership code 5. For every industry, it keeps annual average establishments, annual average employment, and average weekly wage, creating 105 county-industry measures. Employment and wage values with disclosure code N remain missing. The industry list includes overlapping NAICS levels and should not be summed across parent and subindustries.

National Center for Education Statistics

Using ArcGIS Pro, K-12 school locations from the Common Core of Data are spatially joined to counties and summed for 2025. Postsecondary institutions come from IPEDS. The code retains institutions identified as degree-granting in the 2024 field, removes 12 institutions whose names contain online, assigns the remaining institutions to their reported county FIPS, and sums them for the 2025 FAME vintage.

Feeding America

The workflow imports 2023 county records from Map the Meal Gap, retains the overall and child food insecurity rates, and multiplies the source proportions by 100. The resulting measures are percentages of the total population and child population estimated to experience food insecurity.

EPA Excess Food Opportunities Map

Six 2025 facility measures are constructed from point or tabular exports associated with the EPA Excess Food Opportunities Map: hospitality facilities, healthcare facilities, food banks or pantries, anaerobic digestion facilities, composting facilities, and correctional facilities. Each record is assigned a value of one and summed by county. Counties without a matched facility are coded zero. Several source files were spatially joined to counties before Stata import; others were matched using county and state names with manual spelling corrections. Note, source spelling errors are likely to differ year to year.

FDIC Summary of Deposits

The 2025 Summary of Deposits file is collapsed across FDIC-insured branches by county. Reported deposits are thousands of dollars per capita, using the 2024 Census county population estimates. Counties without matched FDIC deposits are coded zero.

Complete variable catalog

This catalog lists every row in the supplied in the metadata. Definitions and years below incorporate measure standardization and construction supported by the supplied code. Warehouse keys are retained so users can match the documentation to the data.

Area Health Resources Files

Warehouse key	Measure	Definition	Year	Unit
primary_care	Primary care physicians per 10,000 population	Nonfederal primary care physicians excluding residents per 10,000 people, using the 2024 Census county population estimate as the denominator.	2023	number per 10,000

Centers for Disease Control and Prevention, National Environmental Public Health Tracking Network

Warehouse key	Measure	Definition	Year	Unit
age_adjusted_prevalence_all_teeth_lost_adults	Age adjusted prevalence of all teeth lost in adults >=65yo, percent	Percent of age adjusted population at least 65 years old with all teeth lost	2022	percent
age_adjusted_prevalence_cancer_adults	Age adjusted prevalence of cancer in adults, percent	Percent of age adjusted adult population with cancer Note: The Tracking Network input filename identifies 2021; metadata lists 2023.	2021	percent
age_adjusted_prevalence_depression_adults	Age adjusted prevalence of depression in adults, percent	Percent of age adjusted adult population with depression	2023	percent
age_adjusted_prevalence_heart_disease_adults	Age adjusted prevalence of heart disease in adults, percent	Percent of age adjusted adult population with heart disease	2023	percent
age_adjusted_prevalence_mental_distress_adults	Age adjusted prevalence of mental distress in adults, percent	Percent of age adjusted adult population with mental distress	2023	percent
age_adjusted_prevalence_no_physical_activity_during_leisure_time_adults	Age adjusted prevalence of no physical activity during leisure time in adults, percent	Percent of age adjusted adult population with no physical activity during leisure time	2023	percent
age_adjusted_prevalence_obesity_adults	Age adjusted prevalence of obesity in adults, percent	Percent of age adjusted adult population with obesity	2023	percent
age_adjusted_prevalence_visit_dentist_annually_adults	Age adjusted prevalence of adults with annual dentist visits, percent	Percent of age adjusted adult population who visit dentist annually Note: The Tracking Network input filename identifies 2020; metadata lists 2022.	2020	percent
annual_average_PM25	Annual average daily particulate matter concentration smaller than 2.5 microns	Annual average daily particulate matter concentration smaller than 2.5 microns	2020	micrograms per cubic meter
annual_average_sunlight_exposure_solar_irradiance	Annual average sunlight energy measured in watts per square meter	Annual average sunlight energy measured in watts per square meter	2020	watts per square meter
hospital_beds_per_ths	Hospital beds per 1,000 county residents	Hospital beds per 1,000 county residents Note: The workflow treats a blank source value as zero before merging to the county frame.	2020	beds per 1,000 people
national_risk_index_score	Composite score (0-100) of natural disaster risks	Composite score (0-100) of 18 natural disaster risks, including drought, heat, cold, flood, earthquake, hurricane, etc.	2023	composite score

Warehouse key	Measure	Definition	Year	Unit
pct_households_with_no_vehicle	Percent of households with no vehicle	Percent of households with no vehicle	2022	percent
Pct_land_in_Agriculture	Percent of land being used for agriculture	Percent of land being used for agriculture	2021	percent
pct_live_half_mile_to_park	Percent of population living within half a mile from a park	Percent of population living within half a mile from a park boundary	2020	percent
pct_weeks_in_drought_2000to2021	Percent of weeks in drought from 2000-2021	Percent of weeks classified as drought during 2000 through 2021.	2021	percent

Federal Deposit Insurance Corporation (FDIC)

Warehouse key	Measure	Definition	Year	Unit
deposits	Bank deposits per county resident	Deposits reported by FDIC-insured branches in the county, converted from thousands of dollars to dollars and divided by the 2024 county population estimate. Counties without matched deposits are coded zero.	2025	dollars per person

Feeding America, Map the Meal Gap

Warehouse key	Measure	Definition	Year	Unit
child_food_insecurity_rate	Food insecurity rate, child	Estimated percent of children experiencing food insecurity in 2023.	2023	percent
overall_food_insecurity_rate	Food insecurity rate, overall	Estimated percent of the total population experiencing food insecurity in 2023.	2023	percent

IES National Center for Education Statistics

Warehouse key	Measure	Definition	Year	Unit
number_colleges_universities	Colleges and Universities, count	Number of colleges and universities	2025	count
number_k12_schools	K-12 schools, count	Number of K-12 schools	2025	count

U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Warehouse key	Measure	Definition	Year	Unit
annual_avg_emplvl_naics_111_crop_production	Employment level, annual average, NAICS 111 Crop production	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_112_animal_production_and_aquaculture	Employment level, annual average, NAICS 112 Animal production and aquaculture	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_115_agriculture_and_forestry_support_activities	Employment level, annual average, NAICS 115 Agriculture and forestry support activities	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees

Warehouse key	Measure	Definition	Year	Unit
annual_avg_emplvl_naics_3111_animal_food_manufacturing	Employment level, annual average, NAICS 3111 Animal food manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3112_grain_and_oilseed_milling	Employment level, annual average, NAICS 3112 Grain and oilseed milling	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3113_sugar_and_confectionery_product_manufacturing	Employment level, annual average, NAICS 3113 Sugar and confectionery product manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3114_fruit_and_vegetable_preserving_and_specialty_food_manufacturing	Employment level, annual average, NAICS 3114 Fruit and vegetable preserving and specialty food manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3115_dairy_product_manufacturing	Employment level, annual average, NAICS 3115 Dairy product manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3116_animal_slaughtering_and_processing	Employment level, annual average, NAICS 3116 Animal slaughtering and processing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3117_seafood_product_preparation_and_packaging	Employment level, annual average, NAICS 3117 Seafood product preparation and packaging	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_311811_retail_bakeries	Employment level, annual average, NAICS 311811 Retail bakeries	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3118_bakeries_and_tortilla_manufacturing	Employment level, annual average, NAICS 3118 Bakeries and tortilla manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3119_other_food_manufacturing	Employment level, annual average, NAICS 3119 Other food manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_311_food_manufacturing	Employment level, annual average, NAICS 311 Food manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3121_beverage_manufacturing	Employment level, annual average, NAICS 3121 Beverage manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_3122_tobacco_manufacturing	Employment level, annual average, NAICS 3122 Tobacco manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_32532_pesticide_and_other_ag._chemical_mfg.	Employment level, annual average, NAICS 32532 Pesticide and other ag. chemical mfg.	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_33311_agricultural_implement_manufacturing	Employment level, annual average, NAICS 33311 Agricultural implement manufacturing	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_4244_grocery_and_related_product_wholesalers	Employment level, annual average, NAICS 4244 Grocery and related product wholesalers	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_4245_farm_product_raw_material_merch._whls.	Employment level, annual average, NAICS 4245 Farm product raw material merch. whls.	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_4248_alcoholic_beverage_merchant_wholesalers	Employment level, annual average, NAICS 4248 Alcoholic beverage merchant wholesalers	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_44511_supermarkets_and_other_grocery_stores	Employment level, annual average, NAICS 44511 Supermarkets and other grocery stores	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_44513_convenience_stores	Employment level, annual average, NAICS 44513 Convenience stores	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees
annual_avg_emplvl_naics_4451_grocery_stores	Employment level, annual average, NAICS 4451 Grocery stores	Annual average of monthly private-sector employment in the specified NAICS industry. Values are missing when BLS assigns disclosure code N.	2024	employees

Warehouse key	Measure	Definition	Year	Unit
